FULL-STACK SOFTWARE ENGINEER

Software engineer experienced in Python with Flask and JavaScript based programming. Developed skills in communication, professionalism, and customer service through experience as a Realtor for 6 years. My journey started as a project and quickly became my passion. Ready to deliver innovative solutions and enhance operational efficiency.

TECHNICAL SKILLS

JavaScript, React, Python, Flask, SQL, SQLite, SQLAlchemy, HTML, CSS

TECHNICAL PROJECTS

StoryStacker- [Github](#) | [Demo](#)

StoryStacker is a command-line interface (CLI) app that allows book club leaders to efficiently manage authors and books.

- Developed using Python, SQLite, SQLAlchemy, Alembic, and Faker
- Devised an intuitive CLI aimed at guaranteeing a seamless user experience
- Created an app tailored specifically for book clubs, streamlining essential tasks with effortless efficiency

App Journal - [Github](#) | [Demo](#)

A journal to store all of your app ideas with the ability to add, edit, and delete your stored ideas.

- Programmed using React, JavaScript, HTML, CSS, and a local JSON server
- Crafted a minimalist aesthetic
- Designed user interface using React, JavaScript, and improved user experience with responsive design techniques

Books For Everyone- [Github](#) | [Demo](#)

Books For Everyone is an app that has 5 book genres and 22 highly-rated books.

- Built using JavaScript, HTML, CSS, and a local JSON server
- Researched and compiled a variety of inclusive books that would leave a lasting positive impact on its readers
- Engineered user interface using JavaScript and improved user experience with responsive design techniques

EXPERIENCE

Booker Realty

Realtor/Property Manager
